Description

Equip Serial no. WNCLTV04TPUM00736

This machine is a mobile, trailer-mounted light tower, consisting of a trailer with a cabinet containing a diesel engine, a fuel tank, a control panel, and an electric alternator. A telescoping tower with four metal halide or LED lights is vertically mounted to the top of the cabinet. As the engine runs, the generator converts mechanical energy into electric power. The metal halide or LED lights run off this power. Receptacles are also provided to power auxiliary loads. The operator uses the control panel to operate and monitor the machine.
